Julieta, of Romeo y Julieta

Manufactured with tobacco from Vuelta Abajo, the most prestigious tobacco zone of Cuba, Julieta seeks essentially the complicity of women in a world traditionally considered more associated to men. The name Julieta for this Habano has been especially chosen to honour "women in Habano".

This is an aromatic vitola with excellent burn, and of slender ring gauge and standard length, such characteristics make it attractive, providing a pleasant experience when being smoked. Julieta puts together the characteristics of a Habano to be enjoyed in short periods of time, following today's life rhythm.

The band has been specially created on this occasion for this new Habano.

120 x 13,1 mm • Ring gauge 33

Actual size
